INTRODUCTION

We are pleased to introduce ourselves as one of the Turnkey Contractors. We have professional experts and a team of fully skilled workers competent enough to carry out technical projects including civil, structural and electromechanical works. We are specialized for Turnkey Jobs in steel structure buildings, warehousing, factories, Labor Camps and RCC multi stories buildings.

Our philosophy is rooted in a keen sense of commitment to customer satisfaction and quality based outcomes within specified timelines.

Our mission is to construct, develop and establish facilities which exceed the Clients' expectation and provide constructive values to the respective businesses.

Our vision is to be a well-reputed construction company in the market to the extent that others follow our proven practices and principles. We also intend to be the Clients' first choice in Construction, Safety and Quality, Project Management and commitment to timely completion while delivering premium quality services.

We employ sound technology and the best professional expertise to serve our customers. We also give great importance to Value Engineering Study and provide the best possible solutions to value for money. We use state-of-the-art technology to build innovative facilities that go in line with the growth of the society and the country. Safety of employees and our subcontractors is a key parameter in our business.

For ready reference, we enclose herewith our company's profile with list of projects in progress, projects executed, organizational chart and commercial documentation.

ARCCO Contracting & Services Company is a Class-A Contracting Firm of commercial, industrial, high rise buildings and multi-unit residential projects in Pakistan.

ARCCO Contracting & Services Company is a diversified firm with the ability to meet its clients' construction needs through traditional and advanced technologies contracting. The company's priority is helping its clients achieve their construction and developmental objectives.

MESSAGE FROM THE MANAGING DIRECTOR (MD)

ARCCO Contracting & Services Company leads the industry in its implementation of progressive practices in the areas of construction, project planning and project management. As a full service construction organization **ARCCO Contracting & Services** Company possesses the in-house abilities to execute projects through conceptualized value addition and specialized construction.

ARCCO Contracting & Services Company is committed to create mutually rewarding partnerships by providing exceptional client service, building quality projects, and meeting schedule and budget realities. The result of this commitment is relationships and projects that endure the test of time.

ARCCO Contracting & Services Company offer a full range of services in the construction field including General Contracting, Project Management and design/ build to the industrial, commercial, and residential sectors. With extensive experience in the construction industry, our project staff offers the level of practical knowledge, experience, and hands on problem solving skills required to deliver a successful project in today's highly diverse and competitive market.

ARCCO Contracting & Services Company team is built with experienced construction professionals and subcontractors that provide expertise and innovative cost effective solutions that lead to successful outcomes. These individuals are available to assist in all facets of the job until completion and offer streamlined and advanced solutions for the construction of the project.

The management at **ARCCO Contracting & Services** Company continues to build the company into a thriving and highly successful operating entity with projects running mainly from Karachi, Pakistan.

“Client’s Satisfaction is Our Motto”

ARCCO SAFETY

We strive to minimize the dangers by making use of internationally accepted safety regulations and procedures.

You may have a dangerous job – but you shouldn't get hurt!

To us, any on-site injury or incident is worthy of the closest attention. The construction industry is a dangerous business, no matter where in the world you may work or how strict the safety regulations are, but we can still strive to minimize these dangers to the best of our ability and by making use of internationally accepted safety regulations and procedures.

- **NOBODY GETS HURT**

Embrace your safety mindset. Nobody gets hurt

In addition, our health and safety managers perform regular inspections to ensure that workers comply with safety regulations, rules and procedures and that safety equipment is being used correctly and is in good order.

- **SAFETY TRAINING & EQUIPMENT**

No worker sets foot on site without proper safety training & equipment

No matter how much we may think about safety, we know that getting every worker into a safety-conscious mind set is the key to a safe work-site. All workers must attend training appropriate to the job hazards they face and regular refresher courses are presented.

We strive to take our performance to the next level time after time.

- Our Commitments
- Safety
- Quality
- Environment

Preventing accidents before they can happen

We want to keep our workers and members of the public safe, so every incident is carefully investigated – even when it doesn't lead to an injury.

We determine:

- What happened?
- How did it happen?
- How can this be prevented in the future?
- Do we need to invest in new safety equipment?
- Should procedures be redesigned to limit risk?
- Should we inform / train our employees to cover this eventuality?

We care...

We care about the safety of our employees and the general public, and we strive to protect them from injury by performing thorough risk-assessments aimed at preventing accidents before they can happen.

We want to keep our workers and members of the public safe, so every incident is carefully investigated – even when it doesn't lead to an injury.

Safety comes above all and nobody gets hurt

ARCCO QUALITY

Our clients deserve to get perfectly executed work and it should be even better than expected.

“Quality”: Our watch word

We execute each task in the construction process with an eye to quality. Each of our clients deserves the very best – perfectly executed projects that exceed even the highest expectations. This means that we get things right and we do it first time around.

A HIGH QUALITY SERVICE

High standards, resources and expertise.

We have a reputation for providing a high quality service. The company maintains high standards and has the resources and expertise to deal with demanding projects and associated infrastructures.

COMPANY QUALITY PROCEDURES

ARCCO provide a full service

Staff are fully experienced in the type of works being executed and working practices being fully documented in long established company quality procedures.

We strive to take our performance to the next level time after time.

- Our Commitments
- Safety
- Quality
- Environment

Meet every specification

From our work methods to the final product of our labors, we will never compromise on absolute quality.

Do better than expected

Whether in our communication with clients or in addressing any concerns they may have, we strive to build trust through honesty, transparency and respect. We don't believe that we are only there to perform construction activities – service excellence is important too!
Never fail an inspection

Quality construction work is work that can be trusted the first time around. If an inspector were to identify an issue, and we needed to rebuild, we would immediately revisit our quality management system in order to determine where we could improve. However, we are proud to report that such cases are extremely rare.

Do better all the time

Nothing is ever so good that it can't be even better. We continually evaluate our progress and look for new, innovative and effective ways to improve our quality and performance. We execute each task in the construction process with an eye to quality. Our clients deserve to get perfectly executed work.

Get things right First time around

ARCCO ENVIRONMENT

We have an environmental management plan (EMP) for every project that we undertake.

Resource-based Environmental Management Plan (EMP)

Any construction project may have negative implications for the natural environment and for residents in the area where it is being undertaken. For this reason, it is essential that an environmental management plan (EMP) be formulated for every project that we undertake. Since each project and site is unique, every EMP is unique too.

THE EMP

An EMP covers four important steps:

- 1. Construction site set-up**
- 2. Construction Phase**
- 3. Post-construction phase**
- 4. Site-specific aspects (e.g. natural and social environment)**

Before we can begin, we have to determine what legislation and standards must be taken into account. These may relate to water use, the disposal of waste water, care for area vegetation, and related health and safety legislations and standards.

MINIMIZING THE EFFECTS

Our aim is to minimize the effects of such activities on the natural environment and neighboring communities as far as possible.

We also need to determine whether any natural or cultural heritage sites may be affected by construction and think about such issues as access roads, entrances, places where large vehicles can turn, and exits.

We also have to plan waste water drainage, erosion prevention strategies and develop a site plan for the construction camp itself. For example, a project may require a site office, ablution facilities for workers, garbage disposal facilities and provision for collecting recyclable materials, storage areas, parking areas and security measures such as fencing.

OTHER FACTORS

This may sound simple but many factors have to be taken into account. Apart from our impact on local communities, we also have to consider the protection of any bodies of water and even prevailing winds which may carry dust. We consider all necessary and best-practice safety considerations in siting storage facilities for hazardous materials, as well as undertaking strategies for fire prevention and control and pollution prevention and mitigation. And of course, we have to ensure that all staff are trained in materials handling safety for any hazardous material employed.

We even have to consider our lighting carefully so that it does not cause a nuisance to our site-neighbors but still provides on-site safety and security and be particularly careful about the storage and dispensing of fuels.

We strive to take our performance to the next level time after time.

- [Our Commitments](#)
- [Safety](#)
- [Quality](#)
- [Environment](#)

Protected sites

We also need to determine whether any natural or cultural heritage sites may be affected by construction and think about such issues as access roads, entrances, places where large vehicles can turn, and exits. Our aim is to minimize the effects of such activities on the natural environment and neighboring communities as far as possible.

It is also important to make contact with neighboring communities and other interested and affected parties in advance to discuss and address any issues and questions that they may have. We limit noise, visual, and cultural impacts to the greatest degree possible. We strive to be aware of the surrounding natural and human environment and respond With sensitivity by minimizing impacts.

In short, we strive to:

- Understand the potential environmental impacts of any project
- Minimize these impacts in any way possible
- Be aware of the surrounding natural and human environment and respond with sensitivity by minimizing impacts
- Plan in advance for any spills or emergencies

- Provide employee training
- Minimize noise pollution
- Have a clean site
- Limit dust pollution
- Limit water pollution and erosion
- Make provision for employees' waste disposal, ablutions and cooking facilities
- Limit pollution risks with bund walls, windbreaks and other interventions
- Limit disturbance to and negative impacts on neighboring communities
- Minimize disruption of natural habitats
- Manage waste in an environmentally sensitive way and encourage recycling

Once we get started

Regular inspections are carried out to ensure that all activities are being carried out within the carefully prescribed guidelines and that no unforeseen hazards remain unaccounted for. We strive to ensure that no materials are unnecessarily wasted, that recycling is practiced and that energy, water and other resources are used in the most effective way possible. In this way, we limit environmental damage, maximize worker safety and take care of the needs of surrounding communities.

Inspectors focus on:

- Storm water drainage
- Soil erosion
- Air and water pollution
- Waste management
- Materials management
- Water quality
- Maintenance of the construction camp
- Staff conduct
- Protection of the natural environment
- Social impacts including cultural impacts, noise, light and visual impact

We strive to ensure that recycling is practiced and that energy, water and other resources are used in the most effective way possible.

Once the construction has been completed...

No task is complete until the final clean-up is done. We pride ourselves in leaving every site in as good (or better) condition than we found it.

This includes:

- Complete removal of the construction camp so that no trace is left behind
- Land rehabilitation is completed as specified including revegetation and landscaping
- Removal for re-use of any unused materials
- Clearance of all refuse and rubble with an emphasis on recycling.

**Emphasis on recycling
Limit environmental impact**

ARCCO Health Policy

We State that:

ARCCO Contracting & Services holds health and safety as core business value and is committed to creating a future free of incidents and injuries, where:

Leadership, passion and commitment are present at all levels working safely enhances quality, improves productivity and generates value. Attitude and behavior replace static as a measure of success people are enabled to make safe choices about their own and their neighbor's safety and to challenge the environment in which they work. Good safety behavior is admired, respected and recognized across the organization Peer pressure has replaced policing and acting unsafely is anti-social. We have a well-trained and fully competent workforce who actively contributes to the safe planning of their work.

We take pride in everyone returning home safely everyday

The company recognizes the importance of discharging all its statutory obligations and duties. Our minimum health and safety obligations are those required by relevant legislation and authoritative guidance. **ARCCO Contracting & Services** will take appropriate steps to meet and, in many cases, enhance these requirements.

The Board of Directors of **ARCCO Contracting & Services** fully endorse this policy. They will ensure that a documented Health, Safety & Environmental Management System is maintained, containing the arrangements and organizational details of how these requirements will be achieved. The Boards will ensure that the Management System is periodically reviewed to ensure it remains legally compliant, achievable, relevant and credible.

Continual improvement will be achieved by effective implementation of the above. Everyone working for **ARCCO Contracting & Services** is required to support and promote this policy and comply with the requirements and duties contained in the SMS – Safety Management System.

ARCCO POLICY

ARCCO Contracting & Services is committed to the delivery of quality products and services.

The objectives of our quality policy which forms part of our vision will be.

To be the company of first choice for all stakeholders to challenge and change the image of construction worldwide to be lean and agile in adopting work processes to complete with the world's leading business.

The board of Directors of **ARCCO Contracting & Services** are committed to ensuring that this Policy is implemented safely and in line with legislation, regulations, codes of practice and the requirements of ISO 9001:2015 Quality Management Systems, by all employees within the group.

Continual improvement shall be achieved through the implementation of the Transformation Team, Business improvement teams, business objectives, audit, analysis of data, corrective and preventive actions and management review.

ARCCO Contracting & Services wants to be recognized as most reliable Engineering and Infrastructure Company, known for its excellence in quality and performance by meeting the expectation of clients and society.

This is **ARCCO Contracting & Services** way to guarantee utmost quality and flexibility, enabling us to generate most superior and competitive products and services in the industry today and in the future.

VISION

To be the leading provider of quality construction and engineering services in the Competitive Market.

MISSION

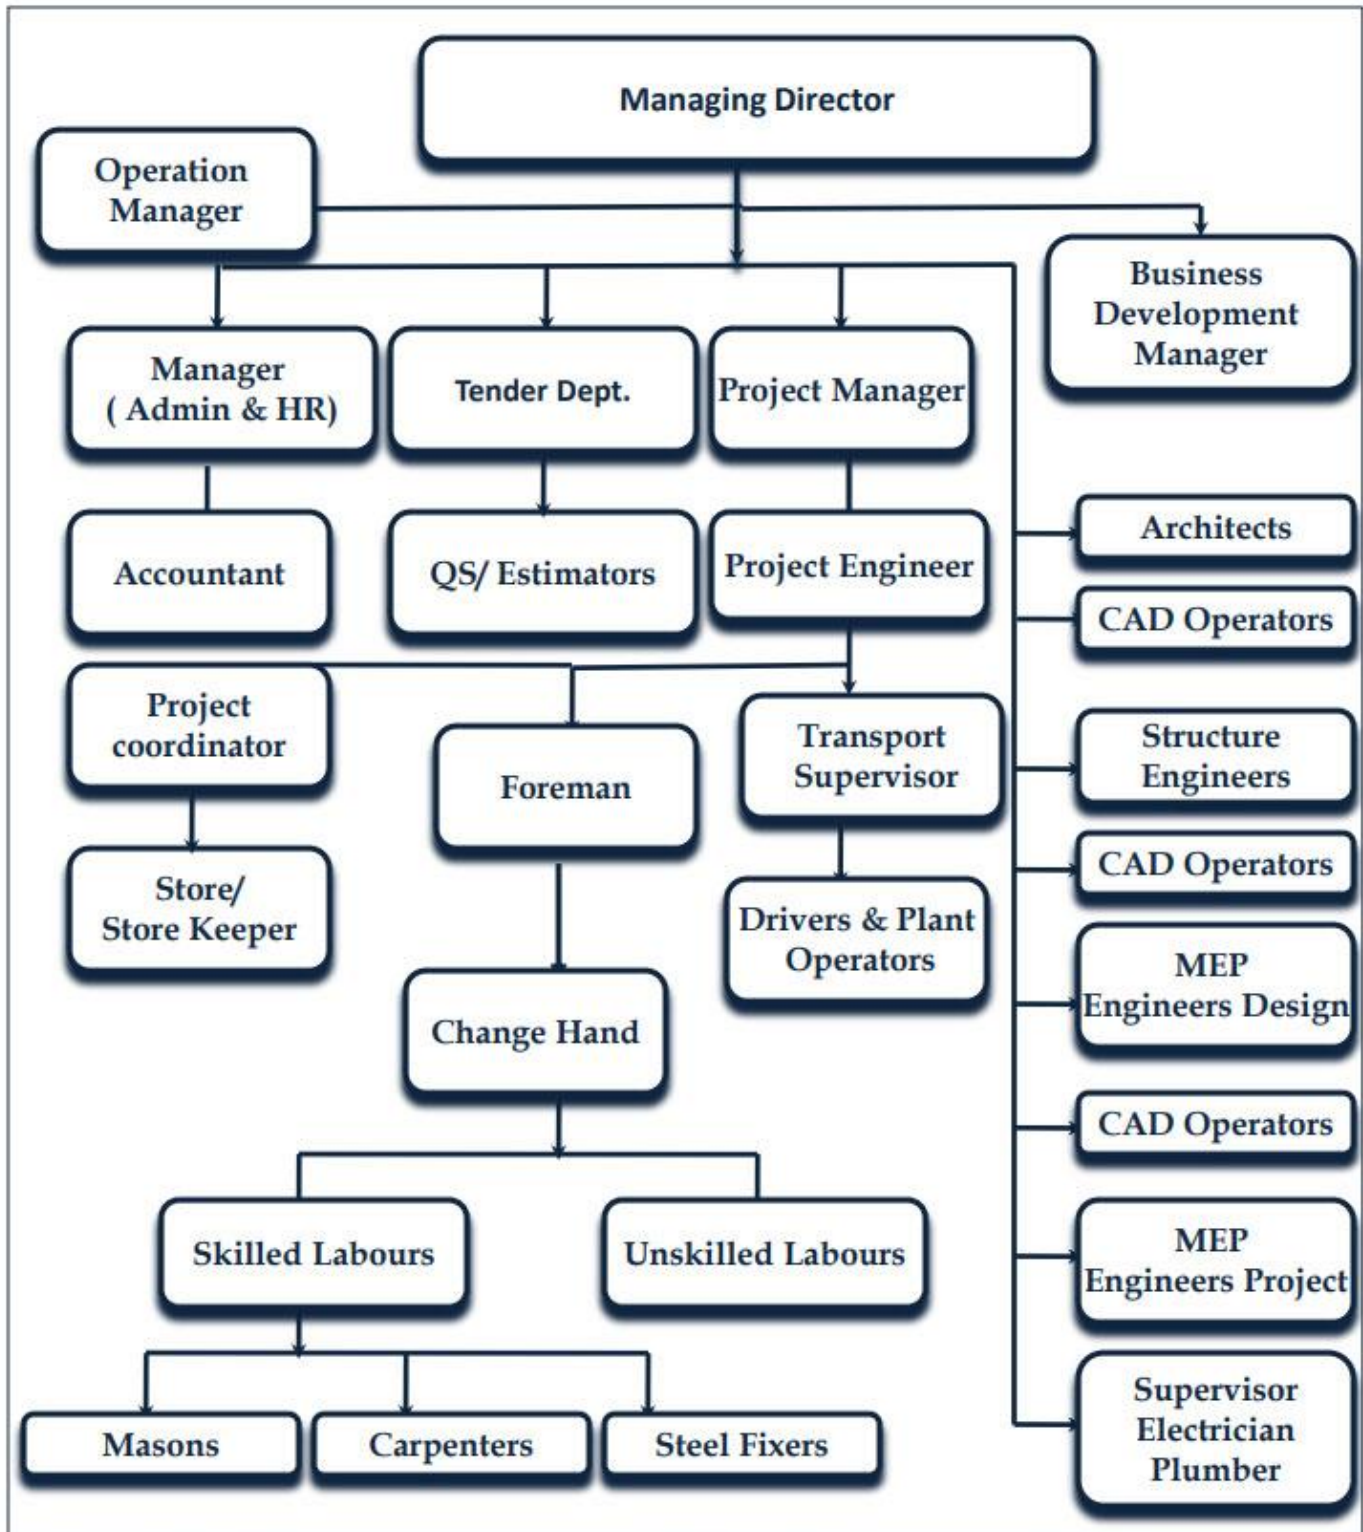

To form long-term relationships of value with our clients and partners by using quality construction and engineering solutions and employing the best resources and latest techniques.

OBJECTIVE

ARCCO aims to provide the highest possible standard of quality and service in the construction industry, giving Clients the best satisfaction the Company can offer.
